

Painlessly, easily, and effectively delivers treatments with 24K pure gold-plated surgical grade stainless steel microchannels, each thinner than a human hair.

"Superficial microinjections of diluted HA using a new microchannel device appears to provide significant visual improvement in moderate to severe acne scarring and skin quality with no adverse effects."

Excerpt from Study presented by Erin Gilbert, MD. PhD at South Beach Symposium 2016

Histology test conducted by Dr. Daniel Del Vecchio and
Dr. Louis Bucky during Lipoplasty on live human skin.

AQUAGOLD®
MICROCHANNEL TECHNOLOGY®
fine touch™

**What our doctors have to say
about AQUAGOLD® fine touch™**

"Patients see immediate results – plumpness, pore size, tightness and overall skin quality! This treatment can also be performed with Botox, to help treat facial flushing and large pores, and with Filler, to help smoker's lines and under eye crepiness."

Jaimie DeRosa, MD
Double Board-Certified Plastic Surgeon
(Boston, MA)

"Anything we put in there can be any secret combination of things...The goal is this goes with every one of your treatments. If you're getting fillers inside, you should get fillers on the outside, so we call this the Finishing Touch. This is infusing real medicines."

Jason Emer, MD
Board-Certified Dermatologist
(West Hollywood, CA)

"Tried out the AQUAGOLD 24 KARAT GOLD microchannel microneedling device. I put some Juvederm and Botox in the cocktail and treated face and neck... Smooth smooth! Loving the results!"

Anna Guanche, MD
Board-Certified Dermatologist
(Calabasas, CA)

For the ultimate skincare regimen, the
SKINWORKOUT™ system is the perfect take-home
maintenance kit in between AQUAGOLD® fine
touch™ treatments. Visit www.cdpswiss.com
