D E F I N E

cooltech\_define is a platform that uses fat freezing technology to reduce unwanted fat from the body on both men and women.

The exclusive design of its applicators allows a complete cooling of the area to be treated, ensuring the best results and a full body contouring in a record time, bringing maximum benefits for both the patient and the clinic.

## Exclusive technology *fat freezing*

Thanks to **cooltech\_define** platform we can eliminate fat bulges in a non-surgical way, up to 4 different areas at the same time and with definitive results as long as the weight remains more or less the same. There is no downtime and it can be done at any time of the year.

With this technique, we avoid surgical procedures that would lead to a prolonged and tedious recovery process.

**Dr. Carlos Fajardo**  
Clínica Fajardo

I have chosen **cooltech\_define** because it meets high medical and technological standards in terms of temperature, suction and treatment time. In addition, it is a Spanish manufacturing technology I can rely on. I can work with 4 applicators at the same time and the great versatility of them makes it possible to adapt to any area of the body.

My patients are very happy and they have not had any side effects. The treatment with cooltech define is the cornerstone of the body treatments in my practice.

**Dra. Paloma Cornejo**  
Clínica Paloma Cornejo

Safe and effective treatment, which allows to achieve excellent results and high profitability in a very short time.

Maximum security

Accurate diagnosis

Excellent cooling capacity

Maximum profitability

Patient satisfaction

## FAT FREEZING TECHNOLOGY

### highly effective

cooltech\_define is a *fat freezing technology* platform, developed to perform adipose tissue reduction treatments, using the “360 cooling” technology that suctions the fatty fold and applies a controlled cooling system throughout the surface of the treated area. Thanks to its nine different applicators, cooltech\_define

can treat localized fat in multiple areas of the body, allowing complete body remodeling. In one session you can treat up to 4 areas in a completely independent way, allowing a body remodeling with a minimum number of sessions providing a great profitability for clinic and doctor.

# HOW cooltech\_define WORKS

## Step by step

**1**  
FIRST  
STEP

Visual and manual identification of the treatment area.

**2**  
SECOND  
STEP

Assessment with cooltech\_define templates.

**3**  
THIRD  
STEP

Application of the Cool Gel Pad on the area to be treated.

**4**  
FOURTH  
STEP

Programming applicators.

**5**  
FIFTH  
STEP

Beginning of treatment.

**6**  
SIXTH  
STEP

End of treatment. Immediate return to normal activities.

# DIAGNOSIS

- Double chin
- Axillary fold
- Suprapectoral
- Infrapectoral
- Supraumbilical abdomen
- Infraumbilical abdomen
- Trochanteric
- Inner side of thigh
- Internal knee side
- Upper front knee
- Pubis
- Supraescapular
- Infrascapular
- Arms

## templates cooltech\_define

cooltech\_define has 9 different diagnosis templates that adapt to every treatment area in order to assess the patient and offer him/her a full body contouring.

# FULL BODY contouring

**cooltech\_define** applicators are designed with the innovative 360° cooling technology. The inside of the applicator is fully covered with cooling plates that work homogeneously on the entire treatment area, providing extraordinary results.

#### Oval HP

Ideal to treat the full contour of the leg. Its wide opening allows treating large areas of hard tissue.

#### Straight HP

Designed to treat flat surfaces and large areas. Indicated for fatty tissue of medium laxity.

#### Curved HP

Indicated to treat curved surfaces and areas of medium size with a high laxity.

#### Oval Curved HP

Its wide head opening allows to treat curved surfaces in large areas with medium laxity.

#### Double HP

Specific for infraumbilical area. The large size of the head allows to treat a wide surface covering the equivalent of two areas in one applicator.

#### Tight HP

Designed to treat flat surfaces and medium areas with high laxity.

#### Tiny HP

Its small size allows to treat very small fat bulges on flat surfaces.

#### Tiny Curved HP

Indicated to treat difficult areas with curved surfaces and small areas.

#### Angled HP

Ideal to treat pubic area. Its ergonomic design allows a perfect adaptation to the treatment area on surfaces with a low laxity.

## Complete full body contouring in two hours

● Double chin

● Infrascapular

● Flanks

● Trochanteric

In just one visit to the clinic in two areas I had 7 areas treated and within a few weeks the results were very visible. I am very happy with the treatment.

**Area of treatment:** Double chin  
**Applicator:** Tiny curved HP  
**Sessions:** 1

**Area of treatment:** Infrascapular  
**Applicator:** Curved HP  
**Sessions:** 1

**Area of treatment:** Flanks
