DISCOVER WHAT IS POSSIBLE

The Flex MD is the gold standard of professional, portable LED Phototherapy, powered by unique precision Tri-Wave MD technology and manufactured in the UK by Aesthetic Technology Ltd.

Trusted by skin care professionals worldwide, the medically certified Flex MD provides unrivalled, clinically proven results for a wide range of indications and combination applications. The versatile flexible design ensures an effective and hygienic treatment delivery for the face and body.

REJUVENATION ACNE PIGMENTATION REDNESS
PSORIASIS WOUND HEALING PAIN PRE/POST TREATMENT

THE POWER OF LIGHT

MOST CLINICALLY PROVEN WAVELENGTHS

Dermalux Blue 415nm

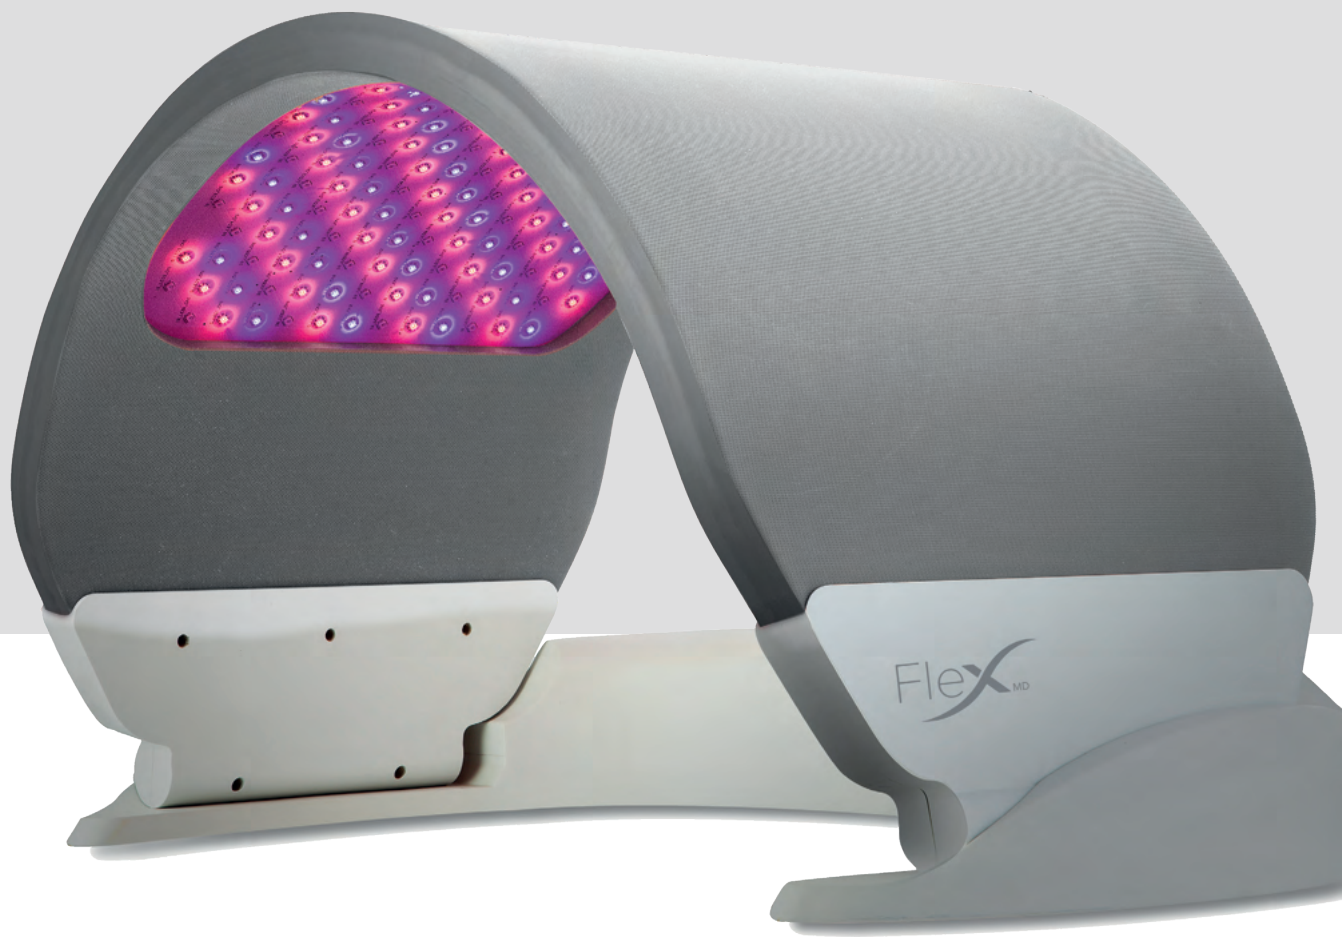

BLUE 415nm is the most proven wavelength to destroy the bacteria which causes acne and improve skin clarity without irritation. Powerful antibacterial action also has a calming effect to reduce redness and inflammation.

Dermalux Red 633nm

RED 633nm supercharges cell energy to accelerate repair and renewal, boost collagen synthesis, increase hydration and enhance circulation to reverse the visible signs of ageing. Ideal for restoring vitality and glow.

Dermalux NIR 830nm

NEAR INFRARED 830nm targets deeper cells to trigger the wound healing process, calm redness and irritation, reduce pigmentation and promote healthy skin. Combine with Red 633nm for advanced rejuvenation benefits.

MOST POWERFUL

Unique Dermalux ceramic LED technology delivers maximum power and minimal heat to ensure optimum performance and consistent treatment outcomes. Results from independent testing demonstrate the Flex MD to be at least three times more powerful than other portable LED devices available.

MOST PROVEN

The Flex MD is a certified medical device, tested against stringent quality, safety and efficacy standards and independently verified to deliver against medical claims. Featuring the most clinically proven wavelengths backed by science, with Dermalux you will simply deliver better results.
